Mentorship for Successful Clinical and Translational Research

Tuesday, April 30, 2013
8:00 a.m. - 4:00 p.m.
Ammon Center Auditorium, Christiana Care, Newark, DE

Goals of the workshop:
- Determine how goals of different disciplines, institutions and people can be integrated into mentoring programs that advance CTR
- Develop specific mentoring programs for women and underrepresented minority researchers
- Develop mentoring programs that assist and encourage basic scientists and clinicians in CTR
- Learn how to build departmental mentoring teams
- Learn how to determine value of mentorship programs

Why should you attend?
The four founding partners of the DHSA area all engaged in Clinical and Translational Research but each institution has a distinct mission. In this workshop, participants will learn a range of different mechanisms of mentoring that will increase the development of successful collaborative teams of investigators. Development of mentoring programs requires input from all stakeholders, so please come with questions and ideas!

Who should attend?
Faculty, staff, students, clinicians, administrators and persons interested in enhancing the quality of clinical and translational research. Departmental chairs, potential mentors and mentees are particularly encouraged to attend.

Registration now available at www.udel.edu/dhsamentorship
